

# POLAR BEARS AROUND AN ICE HOLE

## THE RIDDLE

The game is in the name of the game - polar bears around an ice hole - invented in the days of Ghengis Khan. A clue for you to keep you true - like petals around a rose, you can count each bear's nose. GRRRrrrrrr!!!! How many polar bears do you see?

## THE PLEDGE

*(Raise your right paw and repeat after me)*

I do solemnly promise not to reveal in any way the secret of polar bearism. And, if I do, my fellow bears throughout the world will rip me apart - bit by bit, head to toe, from limb to limb - so help me bearism! GRRRrrrrrr!!!!

CONGRATULATIONS! You are now a polar bear.
