Energizing Student Potential  
Energy Fair in a Box  
Illinois/Indiana  
2019-2020

What Comes in the Box?

- Seven Games from NEED’s Energy Carnival
- Facts of Light station and information that includes light bulb comparisons for students and those attending the Energy Fair
- Energy House – Lessons for a small group of students to build and demonstrate an energy efficient home
- Energy Linked In Designs – Students will create Linked In pages for themselves using career information from all partners in order to learn more about natural gas, electric power, refining, petroleum, nuclear, renewables and more.
- Energy Safety – Students will create exhibits safety information from all partners in order to learn more about safety in electric power, natural gas and the workplace.

- Energy Conservation Contract – Students will complete this activity with their family and will create an exhibit for the Energy Fair to have attendees complete the contract as well.
- Energy Information Exhibits – Students will create informational exhibits for attendees to tour. Topics will include:
  - Energy Efficiency and Conservation
  - Nuclear Energy
  - Petroleum
  - Natural Gas
  - Transportation Fuels
  - Electricity
  - Heating and Cooling
  - Hot Water Heating
  - Lighting
  - Wind
  - Solar
  - Plug Loads
- Bumper Stumpers – A NEED game to unscramble energy “vanity plates”

Other Fair Resources

- Passport Template and Ink Stamps to stamp passports as attendees tour the Energy Fair
- Draft Press Release
- Listing of Partner resources and other opportunities for which attendees at the Energy Fair would be eligible.

- $100 in additional funds added to the school grant to purchase materials for the Fair. (Examples: snacks, art supplies, prizes)
